

IN 2018 THERE WERE **62,367**
OPIOID-RELATED DEATHS IN THE
UNITED STATES ALONE

HOW CAN THIS BE PREVENTED?

Ask:

Percocet, Vicodin and Codeine are all prescribed pain medications. Did you know Heroin is also an opioid? Ask your doctor and pharmacist about addiction potentials.

Learn:

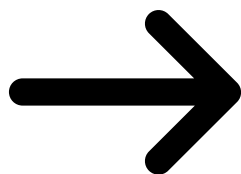

Naloxone or "Narcan" is a nasal spray that can reverse an opioid overdose & save a life. You can get Narcan at most Pharmacies

Signs of an overdose include:

Recognize:

- slow, shallow, or no breathing
- unconscious or nonresponsive
- pale, grey or blue skin
- snorting or gurgling sounds
- foaming at the mouth
- vomiting

Respond:

- **Call 911**
- **Perform Rescue Breaths**
- **Administer Narcan**
